All-new manual, labs, and PowerPoints

## **Advanced Electromagnetic Radiation Seminar**

Safety Harbor Spa & Resort, Clearwater, FL, 3 through 7 December 2012

Don't miss out on this IBE Dream Team opportunity, IBE's top four experts in the field of electromagnetic radiation joining forces to bring you the latest emerging issues and solutions.

Learn the latest research and technology from IBE 312 instructors Spark Burmaster and Tom Wilson, and get hands-on lab support from IBE 212 instructors Larry Gust and Rob Metzinger.

Greater emphasis will be placed this year on real-world solutions, best practices, and emerging issues such as wireless communication and power quality. Vital identification and mitigation techniques will be examined for AC Magnetic Fields, AC Electric Fields, and Radio Frequency, including frequencies in the non-ionizing radiation, power, and communications bands.

**Hurry! Attendance limited to 25 students**

**Sign up today, and save \$100 with our early-bird pricing**  
returning IBE 312 students may audit this seminar at half-price

And be sure to reserve your room at the fabulous beachfront Safety Harbor Spa & Resort, at IBE's exclusive attendee discount (40% off published winter rates), using Group Code: GBBE; or simply call the resorts toll-free number, and tell them you're coming with us: (888) 237-8772. The cut-off date for this special discount is 2 November, so reserve your WiFi-free room soon!

All attendee guest rooms, as well as the IBE classroom (located on the resort's grounds), will be WiFi-free, fragrance-free, and all rooms and laundry will be cleaned with non-toxic products.
